

TUESDAY TECH TIP

DBNZ Tech Tip Of The Week

E-Learning

The DeBeer E-Learning Program is a suite of online training courses developed for Bodyshop Professionals to enhance their knowledge and understanding of refinishing techniques using DeBeer Refinish coatings systems.

E-Learning TRAINING AT YOUR FINGERTIPS

The program has been developed by the Australian DeBeer Refinish Technical Department specifically to meet the needs of the Australasian market.

The program provides you with up-to-date training content at your fingertips, accessible any time on any device, in a format that allows you to work through the course content at your own pace. You can also go back and review content at any time.

They use a combination of text graphics and video content to engage users of all experience levels.

The DeBeer E-Learning Program will continue to be complemented with face-to-face training sessions which will provide a review of the content presented during the E-Learning courses, supplemented with hands on application training.
